1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.
2. Authorization for this examiner's amendment was given in a telephone interview with Douglas Portnow, Reg. No. 59,660; on February 5, 2009.

4. The following is an examiner's statement of reasons for allowance: None of the prior art of record, alone or in combination, discloses an interventional tool and a method with the tool for repairing a cardiac valve of a patient having leaflets, where the tool and method include, inter alia, a catheter having an inner shaft, a capture device with at least two extendable distal elements and at least two extendable proximal

elements, each of the proximal and distal elements having a proximal end adjacent the shaft and a distal end, where the proximal and distal elements are independently deployable and self-expand in an outward radial direction from the shaft to a deployed position further away from shaft than a retracted position; where the length in each of the elements protruding from the shaft is adjustable, where the shaft is movable relative to the catheter so that the proximal and distal elements in their deployed positions are moved into engagement with each other, and where deploying the proximal and distal elements, in the method, captures the valve leaflets.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
